Showroom: 10 Christchurch Road, Ringwood BH24 1DN · Tue–Sat 10am–4pm

YES, YOU CAN HAVE A WOODBURNER

No chimney? You're closer to a real fire than you think

New build, bungalow, extension or garden room: if you don't have a chimney, a modern **twin wall insulated flue** does the job of one. It takes smoke and gases safely out of your home, and our team plans, supplies and fits the whole thing.

What is a twin wall flue?

It is a factory-made stainless steel chimney with two skins and a layer of insulation between them. The insulation keeps the flue gases hot, so the stove draws well, and keeps the outer skin cooler than a single-skin pipe.

The flue is fitted to your stove, runs up through the house or up an outside wall, and finishes with a terminal at the right height above your roof. Twin wall comes in stainless steel or matt black, so it can be a feature or blend in.

Why homeowners love it

- **Put the stove where you want it**, not where an old chimney happens to be.
- **Built to UK Building Regulations** and signed off with a HETAS certificate.
- **Clean, modern look** that suits both contemporary and traditional rooms.
- **One team from start to finish:** no juggling builders, roofers and stove shops.

A Chesneys Sanctuary with log store fitted by No1 Fires on a home with no chimney, with twin wall flue straight up and out through the roof.

The same job from outside: a neat twin wall terminal above the roofline.

Not sure if your home is suitable?
Send us a few photos and we'll tell you. Most homes can have a stove.

Call 01425 333760

YOUR TWO ROUTES

Inside or outside: we'll find the best way out

There are two ways to run a twin wall flue. At your survey we'll look at your room, the floor above and your roofline, then recommend the route that looks best and works best.

Twin wall going up through the ceiling joists on a No1 Fires installation.

Internal route

The flue rises from the top of the stove, through the ceiling and the floor above (where it's usually boxed in neatly), then out through the roof.

- The flue stays warm, which helps the stove draw well
- Makes the flue part of the look of your room
- Nothing on the outside walls of your home

An external twin wall flue fitted by No1 Fires for a TermaTech TT20 in a garden room.

External route

The flue goes out of the back of the stove, through the wall, and up the outside of the house to clear the roof.

- Less disruption inside, with no work to the rooms above
- Great for single-storey rooms, extensions and garden rooms
- Can be finished in black to suit the house

Safety comes first, every time

Every flue we fit is planned to the manufacturer's instructions and UK Building Regulations (Approved Document J), including heights above the roof and safe distances from anything combustible. Our installations are HETAS-registered (business no. 10151), and we test and commission everything before we hand over.

CHOOSING YOUR STOVE

Four stoves we'd happily put in our own homes

They're hand-picked from our range because they burn cleanly, look superb and work well with a twin wall flue. Here's how they compare. Come and see them in the showroom.

Stove	Heat output	Efficiency	Fuel	Flue	RRP from
TermaTech TT44 Danish, compact, 7 versions	4.8kW 3–7kW range	81%	Wood	150mm	**£2,340**
Dik Geurts Orbe Dutch, round, statement piece	6.5kW 5–9kW range	81.6% · A+	Wood	150mm	**£3,120**
Dik Geurts Ivar 5 Store With built-in log store	4.9kW 4–7kW range	82% · A+	Wood (multi-fuel grate optional)	125/130mm	**£1,675**
Chesneys Sanctuary With log store	4.8kW	86.4%	Wood	125mm	**£1,999**

Prices are the full RRP for the stove only, including VAT, as of November 2026. Flue, hearth and installation are quoted separately after your survey. Ask about current showroom offers.

Three questions that narrow it down

1. How big is your room?

Around 5kW is plenty for a typical living room or snug. Bigger and open-plan spaces may suit something like the 6.5kW Orbe. We work out the right output at your survey, because a stove that's too big runs too slowly and won't burn cleanly.

2. Wood or multi-fuel?

Burning dry wood is the cleanest and simplest choice. If you'd like to burn smokeless fuel too, the Ivar 5 takes an optional multi-fuel grate.

3. Smoke control area?

All four meet the Ecodesign emission standards. The Orbe, Ivar 5 and Sanctuary are DEFRA approved for UK smoke control areas. If you live in one, we'll confirm the approval for your exact model.

FEATURED STOVE

TermaTech

TT44

TermaTech TT44 (product image, termatech / No1 Fires website)

Danish design that's simple to run

The TT44 is compact, beautifully rounded and burns really cleanly. Its large curved glass gives a lovely view of the fire, and it's sized just right for a typical living room. The flue can leave from the top or the back, so it suits both internal and external twin wall routes.

RRP FROM

£2,340

TT44 in black steel · stove only, inc. VAT

Heat output	**4.8kW (3–7kW range)**
Efficiency	**81%**
Fuel	**Wood**
Flue	**150mm, top or rear**
Size (H×W×D)	**998 × 501 × 369mm**
Weight	**116kg**
Extras	**Airwash glass · outside air connection**

Choose your version (RRP)

TT44G with side glass	**£2,880**
TT44H (taller)	**£2,670**
TT44HG (taller, side glass)	**£3,084**
TT44-CG grey TermaStone	**£3,000**
TT44HS-CG grey TermaStone	**£3,120**
TT44S marbled soapstone	**£3,400**

Why we like it: it's easy to live with. One simple air control, a big ash drawer and a cast iron door with magnetic closing make it one of the most effortless stoves we sell.

Picture a TT44 in your home?
Send us a photo of your room and we'll quote for the stove, twin wall flue, hearth and fitting.

ON DISPLAY

Dik Geurts

Orbe

A real No1 Fires installation: Dik Geurts Orbe on a round hearth with a black twin wall flue.

The round statement stove

The Orbe is a room centrepiece, and it's at its best when you see it lit. With 6.5kW on tap it's ideal for a good-sized living room or a modest open-plan space. Dutch craftsmanship, a clean front view of the flames and a full range of control, from a gentle glow to a roaring fire.

RRP

£3,120

Orbe · stove only, inc. VAT
Orbe High: £3,620

Heat output	**6.5kW (5–9kW range)**
Efficiency	**81.6% · energy class A+**
Fuel	**Wood (logs up to 25cm)**
Smoke control areas	**DEFRA approved · Ecodesign**
Flue	**150mm, top or rear**
Size (H×W×D)	**1052 × 480 × 480mm**
Hearth	**Full constructional hearth**
Outside air	**Yes, rear connection**

Why we like it: nothing else looks quite like it. Paired with a round hearth and a black twin wall flue it gives a beautifully clean, architectural finish, as the photo shows.

The Orbe is on display in Ringwood
Pop in Tuesday to Saturday, 10am–4pm, and see it burning.

DANNY'S PICK

Dik Geurts

Ivar 5 with log store

Dik Geurts Ivar 5 Store (product image, No1 Fires website)

Superb control, solidly built

The Ivar 5 Store is one of our manager Danny's favourite stoves. It's robustly built, and the control it gives you over the flame is superb: open it up for a lively fire after a cold walk, or turn it right down for a slow, lazy burn on a quiet evening.

The built-in log store keeps your logs tidy and raises the fire to a lovely viewing height. The firebox takes logs up to 35cm, so there's less splitting.

RRP

£1,675

Ivar 5 Store · stove only, inc. VAT

Heat output	**4.9kW (4–7kW range)**
Efficiency	**82% · energy class A+**
Fuel	**Wood; optional multi-fuel grate**
Smoke control areas	**DEFRA approved · Ecodesign**
Flue	**125/130mm, top or rear**
Size (H×W×D)	**850 × 450 × 350mm**
Hearth	**12mm non-combustible hearth**
Outside air	**Rear or base connection**
Approvals	**EN16510-1, Defra, Ecodesign, Clearskies, HETAS and more**

Why we like it: great value with no compromise. It's listed for a 12mm hearth, which opens up slim, elegant hearth designs. On display in our showroom.

Come and feel the difference

The Ivar 5 is on display in our Ringwood showroom. Tuesday to Saturday, 10am–4pm.

DANNY'S FAVOURITE

Chesneys

Sanctuary with log store

A real No1 Fires installation in Ferndown: Chesneys Sanctuary with log store on a honed granite hearth, with twin wall flue up through the roof (no chimney).

Exceptional efficiency, stunning flames

Danny regularly calls the Sanctuary his favourite woodburner on display, thanks to its flame picture, premium build quality and controllability. At **86.4% efficiency** it gets more heat from every log, and it's DEFRA exempt for smoke control areas. Chesneys says its emissions are a tenth of what a comparable DEFRA-exempt stove is allowed to produce.

RRP
£1,999
RRP · stove only, inc. VAT

Heat output	**4.8kW**
Efficiency	**86.4%**
Fuel	**Wood**
Smoke control areas	**DEFRA exempt**
Flue	**125mm**
Standards	**Ecodesign 2022 compliant**
Glass	**Large window with airwash**
Outside air	**In-built direct air feed**
Finish	**Silver or brass door furniture**

Why we like it: it's a premium stove you'll notice every evening. The log store finishes the design perfectly, as on our Ferndown installation above.

Fall for the Sanctuary in person
See it lit in our Ringwood showroom, or ask for a fitted quote with twin wall flue.

FINISH IT BEAUTIFULLY

Choose your hearth shape

Every stove sits on a non-combustible hearth. It's a safety requirement, and it's also where your installation really comes together. We supply and fit hearths, often in honed granite, made to suit your stove and your room.

Teardrop

A soft, curved front that flows out from the stove. Lovely in corners and on angled installs, and it softens the look of a contemporary stove.

Quadrant

A quarter-circle made for corners. It tucks neatly into the angle of two walls, saves floor space and puts the stove on show across the room.

Square / rectangular

Clean, classic lines for a stove against a flat wall. Simple, timeless, and easy to pair with a log store and a straight twin wall flue.

Square hearth on a No1 Fires twin wall installation (Wiking Miro 4).

The rules, in plain English

- Under UK Building Regulations (Approved Document J), the hearth must be **non-combustible** and extend a set distance **in front of and to the sides** of the stove, so a stray ember lands safely.
- Stoves that can heat the floor beneath them need a **full constructional hearth** (the Orbe, for example). Some stoves are tested to sit on a thinner plate: the Ivar 5 is listed for a **12mm** non-combustible hearth.
- Your stove's manufacturer also sets minimum distances to walls and anything combustible, and we design the hearth around these.
- We check all of this at survey and include the right hearth in your quote, so you don't have to work it out.

Like round better? We can do that too: see the Orbe installation on page 6.

Not sure which shape suits your room?
Send us a photo of the space and we'll suggest the hearth that looks best and meets the regulations.

WHY NO1 FIRES

One team. Every step. Year after year.

Most people end up dealing with a stove shop, an installer, a roofer and a sweep. With No1 Fires you deal with one local team that looks after your woodburner from the first photo you send us to the logs you burn next winter.

01

Survey & quote

Send us photos for a quick quote, or we'll come to you. We'll plan the flue route, hearth and stove size, and give you a clear quote.

02

Supply

Choose from our showroom range of quality stoves, twin wall flue and hearths, and see many of them burning before you decide.

03

Install

HETAS-registered installation (business no. 10151) by our own team. We always use proper twin wall or a lined chimney, never shortcuts. Tested, commissioned and certified, with a demonstration of how to use your stove.

04

Sweep

We sweep and inspect lined woodburners and twin wall flues, and give you a sweeping certificate for your records. Join our sweeping plan and your installation comes with a **5-year guarantee**.

05

Logs

Keep it burning clean with our kiln-dried logs, delivered in builders' bags (£150 per bag on our website). Dry wood means more heat, cleaner glass and a cleaner flue.

✓

Local & trusted

A local Ringwood showroom with over 20 years of experience and a team that knows these stoves inside out.

5 YEAR

5-year guarantee on your installation

Join the No1 Fires sweeping plan and your installation is guaranteed for 5 years. Your stove stays swept, safe and efficient, and you get extra peace of mind.

What our customers say

> *"Danny and his team did a fantastic job of getting my woodburner fitted - great price and brilliant service."*
>
> **Henry S., Google review**

> *"Very efficient, clean and tidy. We are really pleased with our new wood burner."*
>
> **Jeanette & Shaun, Google review**

> *"The end result has been amazing and it's completely transformed our living room."*
>
> **Doug M., Google review**

WHAT HAPPENS NEXT

From first photo to first fire

1 **Send us photos or book a survey**
Your photos and a few measurements are often enough for a quote. Where needed, we'll visit to check the flue route.

2 **Choose your stove and hearth**
Visit the showroom to see stoves lit, or let us recommend the right output and finish for your room.

3 **Approve your quote and book in**
Our current lead time is around 6–10 weeks, so it pays to get in early before the cold weather arrives.

4 **Installation day**
Our fitters install the hearth, stove and twin wall flue, then test and commission everything and tidy up as they go.

5 **Handover & certificate**
We show you how to light and control your stove, and register the work with HETAS.

6 **Enjoy, with sweeps & logs on tap**
Book your annual sweep and order logs with the same friendly team.

YOUR FREE QUOTE

One quote. Everything covered.

Tell us about your room and we'll put together a clear quote for the whole job:

- The right stove and heat output for your room
- A twin wall flue route, internal or external
- A hearth to suit your stove and the regulations
- HETAS-registered installation and certificate
- Annual sweeps and kiln-dried logs, if you'd like them
- **5-year installation guarantee** when you join our sweeping plan
